

A B S T R A C TBLOCK COPOLYMER COMPOSITIONS, HAVING IMPROVED MECHANICAL  
PROPERTIES AND PROCESSABILITY

A composition to be used for the manufacture of mono-  
or multilayer films for food-wrap applications comprising  
from 5 to 40 wt% of a styrenic block copolymer, a  
polyolefin in an amount of at least 40 wt% and optionally  
5 a resin which is compatible with the hydrogenated  
poly(butadiene) blocks of the styrenic block copolymer in  
an amount of from 0 to 25 %wt, wherein all weight  
percentages are relative to the weight of the complete  
composition; a styrenic block copolymer to be used in  
10 said composition, and mono- or multi-layer films  
comprising said composition.
